

RED CROSS + News and Notes +

Red Cross Creed.

Cut this out, Red Cross workers, and treasure it; it was written by Miss Gertrude G. Pearson, of the Portsmouth, Va., Home Service Section, and ought to be pinned to the wall of every auxiliary work room and chapter headquarters: "To be glad of life because it gives you a chance to show your love of country; to support the Red Cross and learn all about the work of the Home Service Section; to be contented with your possession, but not satisfied with yourself until you have helped relieve a war time heartache; to despise nothing in the world but indifference, and to fear nothing except extravagance and waste; to be governed by the determination to assist in all war work; to be sympathetic toward those made unhappy by the war; to covet nothing that is your neighbor's, but his public spirit and his patriotic zeal; to think seldom of your worries, often of your blessings, and every day of the boys over seas and to spend all the time you can with body, and with soul in doing your part in the winning of the war—these are the little guide post for the American on the footpath to victory."

Great Boxing Exhibition.

All Fairmont men who are fond of a good boxing match ought to make an effort to attend the boxing contests held in the old West Virginian quarters by some of the boys from the Connersville offices. Mr. Hamilton from the fire department, drops in to referee, and though much noise is made his decisions are rarely questioned.

Nine boxes have been made by the athletes and tops and sides and bottoms in great numbers have been completed for assembling. Some fine day soon a regular procession of boxes will be done, and crowded shelves at headquarters will sigh with relief. This boxing exercise is excellent, and the chapter highly recommends it to those who have been contemplating golf, tennis or swimming, none of which can equal the beneficial features of these contests as conducted in the chapter's special packing and shipping department.

Annabelle Auxiliary for July.

Mrs. E. G. Garten, secretary of the Annabelle auxiliary, reports the following completed and returned to chapter headquarters: Four pairs of socks, 2 sweaters, 50 house wives, and 4 suits of pajamas; besides this 8 boys leaving for cantonments were each provided with a comfort kit and sweater. Workers have slackened slightly in attendance, although those reporting for duty are energetic and enthusiastic. Annabelle has always been one of our top notch auxiliaries and the people of Annabelle especially warm supporters of the work. The slowing up of the women is doubtless because of extra home duties at this time, and not lack of interest.

Catawba Stages Ball Game and Pic Social.

Catawba put on a sort of double header benefit for its Red Cross auxiliary according to the report of Mrs. F. L. Malone, auxiliary secretary. The married men and the single men opposed each other in an exciting ball game; the secretary neglects to state the score or which side won, as auxiliary interest evidently centered on the proceeds of the game which amounted to \$23.05. It was doubtless an excellent game, or it would not have moved the assembled fans to such generosity.

The pic social was held in the school house, and cleared \$46.28 for the Red Cross work of the auxiliary. The proceeds of these benefits will be devoted to fitting up a work room as the auxiliary is newly organized and needs many things in order to accomplish the amount of work it expects to do. This is a fine start for Catawba and the chapter extends congratulations.

Good Work, Kingmont!

Kingmont auxiliary secures fourteen new members according to the report of A. D. Brill, the auxiliary treasurer. The names of the new members are: Mrs. Farrell Tucker, Mrs. David Watkins, Miss Olive King, Miss Teresa Pulice, Miss Rosa Pellegrin, Miss Mary Pellegrin, Miss Lena Helen Durrett, Russell Gerkins, Lawrence Cowell, Perry Tett, David Watkins, William King, John Alberico and Fred Gerkins. Besides this, Kingmont turned in to the chapter treasury the sum of \$62.35. This is great work; new members always mean so much to an auxiliary, either in fresh enthusiastic people in the work room, or interested friends among the men who will stand by their auxiliary when demands are made. Kingmont has been active in this respect and the auxiliary there will benefit very much by such effort, and the chapter accordingly.

Some Donations.

Middleton auxiliary brought in \$15.55 for the chapter fund this week; their report of new members, a benefit, and July work, appeared last week.

One high school young lady donated

\$3.90 to the R. C., wishing to aid in this way, because personal work was not possible.

The golf tournament at the Country club netted \$5.75 last Saturday which amount was brought in this week. These Saturday contests grow more and more interesting to those in attendance and are a needed relaxation and a great help to the chapter fund.

Sock Wool Arrives.

One hundred pounds of sock wool is on hands at headquarters for distribution to the knitters; this wool is the natural undyed color and of a fine, soft quality.

Let us get it out as soon as possible. The report for the week's knitting returned to headquarters shows, 23 sweaters, 62 pairs of socks, and two helmets. Sixty hanks of sweater yarn and 21 hanks of sock yarn were given out to the workers.

Hospital Garments Report.

Last week's report of the hospital garments was omitted so here it is, together with this week's report: July 19th to 26th, work taken out by auxiliaries and circles, 117 suits of pajamas, and 16 hospital shirts. Work cut, 175 garments. Work returned, 488 house wives, 801 button bags, 44 suits of pajamas, and 30 bed shirts. The report for the week, July 26 to August 2, shows, 35 hospital shirts, 296 button bags, 726 house wives, 48 suits of pajamas, 9 extra pajama coats, 1 day shirt, 180 gun wipes, returned completed to headquarters. 48 suits of pajamas were cut for making.

Hammond Auxiliary Report.

Miss Verna Sines, secretary of the Hammond auxiliary, reports for July work, 17 pairs of baby booties, 120 housewives, and 3 sweaters. One machine, costing \$27.00 has been purchased for the work room, and other money expended amounting to \$18.55. Red Cross work is prospering at Hammond and the workers faithful and interested.

Executive Board Meets Monday.

Let every member of the executive committee be present Monday evening at 7:30 at headquarters. Regular session will then be held.

NAVY EAGLES ARE NOT LITTLE CRAFT

First One Has Been Launched and it is 204 feet Long.

(By Associated Press) DETROIT, Aug. 3.—With the launching of Eagle-I, the first of the fleet of submarine destroyers being built by Henry Ford for the United States Navy, detailed information concerning the construction, purposes and possibilities of this newest naval weapon became public for the first time. The general belief that the boats were little more than exaggerated launches, equipped with light guns, was dispelled when the vessel, 204 feet long, larger than the old type of United States destroyers, was dropped into the waters of River Rouge by a great mechanism operated by hydraulic pressure. Tabulated by dates the story of the Eagle is this:

December 22, 1917—Henry Ford offered to build boats for the navy.

December 27—Discussed plans with Washington officials.

January 15, 1918—Navy department awarded Ford company contract for Eagles.

January 18—Work on design of Eagles completed.

January 20—First piece for boat was completed.

February 7—Keel for first Eagle was laid.

February 29—Construction of the shipbuilding plant began.

March 1—Hull of the first Eagle was completed.

NOXZEMA

The Greaseless, "Feel It Heal" Skin Cream.

Carries Convincing Proof With It. Rev. Dr. Faulkner, 1821 St. Paul street, Baltimore, Md., says:

"Noxzema surpasses anything I have ever used for burns and any irritation of the flesh." Try Noxzema today and you will appreciate why so many people are so loud in its praise. Heal your sore, inflamed skin with this non-greasy, non-soiling antiseptic cream. It takes the fiery pain from the irritated skin almost instantly, and leaves it cool and balmy.

Noxzema is on sale at Crane's Drug Store and the H. H. Drug Co. in 25 and 50c jars. Noxzema Chem. Co., 1817 Charles St., Baltimore, Md.

SCREEN STAR CAPTURES ARMY OFFICER IN LIBERTY LOAN DRIVE

Marguerite Clark and Lieutenant Harry P. Williams.

(By Newspaper Enterprise Assn.) WASHINGTON, D. C., Aug. 3.—Miss Marguerite Clark who long since won the heart of the American public as actress and movie-star has chosen from those millions of hearts just one to keep for all her own. It used to belong to First Lieutenant H. Palmerston Williamson, Ordnance department, United States Army.

The engagement of Miss Clark to Lieutenant Williams is the culmination of a long friendship, begun when Lieutenant Williams was at Lawrenceville Academy preparing for Yale. The friendship was renewed last spring when Miss Clark toured the south and west in the Liberty Loan campaign, and teaching New Orleans found in Lieutenant Williams an old friend, a generous bond buyer, and an ardent wooer.

Miss Clark was born in Cincinnati, Ohio, and went to New York to study music. Her charming voice and petite and lovely person soon won her a place in musical comedy in which she starred with De Wolfe Hopper. Lieutenant Williams and his fiancée with the soldier's parents, are now in Washington, where the engagement has just been announced. Lieutenant Williams is assigned to the Ordnance department but is expected to be assigned to overseas service in which case the wedding will be an event of the near future.

May 10—Work on the construction of Eagles was begun in shipbuilding plant.

June 15—Several boats were assembled.

July 11—First completed boat launched.

The Eagles are within thirty feet of approximating the length of the standard 3,500 ton wooden ships being built for the Emergency Fleet Corporation.

Viewed from above deck, the Eagle is much more like a flounder than a mackerel. Its midship cross-section bears a strong likeness to the lines of a canal barge. Its stern is square and blunt. The remainder of the ship is built generally in straight lines and plane surfaces. The bow, however, tapers to a knife-like edge, seemingly sharp enough and strong enough literally to cut a submarine in two.

Except for the high deck house and the bridge a little forward amidships the deck of the Eagle is unbroken. Utility has been the ruling consideration, with low cost production second in importance, and with beauty and comfort only incidentals.

The Eagles are built to pass easily through the Welland Canal and the boats' draught and beam are also small enough to permit of the boats' passing through the New York state barge

canal. The boats will have a draught of eight feet when fully equipped and ready for sea. A steam turbine, geared to the propeller shaft on which is mounted a single three-blade screw of rather deep pitch, furnishes the motive power. Crude oil will be used as fuel. The tank capacity is easily sufficient for a steaming radius equal to the distance across the Atlantic.

There is not a forging or rolled beam in the entire ship. Everything is pressed from sheet metal, cold, by means of automatic machinery that cuts every piece to an exact pattern, then punches the rivet holes and bends every part to its required shape.

After the launching of the first Eagle Mr. Ford said: "I am, of course delighted at this initial success, but I knew it would be all right. When you have a task like this, entrusted to men who know their business, it can't go wrong. I left them alone—but watched all of the time."

"There's no use making unnecessary fuss over a little launching. We've got a lot more back in the shops nearly ready to follow, Eagle-I."

Nothing Goes to Waste in Britain

(By Associated Press) WASHINGTON, Aug. 3.—Trash heaps in England, which have given up thousands of dollars worth of waste fats for use in making munitions, now are being robbed of their picturesque adornment of tin cans, which likewise will do their bit toward putting the German army back where it belongs. Necessity for conserving a metal absolutely indispensable to the conduct of war virtually has eliminated the use of new tin from civilian pursuits. Its place is being taken by salvaged tin, gathered in the dumps and

POLITICAL ADVERTISING POLITICAL ADVERTISING POLITICAL ADVERTISING

A Platform That Rings True

What Major Davis Elkins Stands For In His Declaration of Principles, Announcing His Candidacy For the Republican Nomination For United States Senate.

Major Davis Elkins

He says:—"Prompt, decisive and vigorous prosecution of the war against Germany and her allies is the supreme duty of the hour."

He says:—"As an American citizen and soldier I am heart and soul, in person and not by proxy, for the triumphant success of our cause and have but one purpose in common with the Commander-in-Chief—the war must be pushed to a successful finish, and woe betide those who would hinder or delay such a victory."

He says:—"In this war of all wars woman has earned many times over her complete and equal political rights with her brother man. I therefore favor the National Suffrage Amendment giving women the right to vote." (No other candidate for the U. S. Senate mentions this important subject in his platform. Why.)

He says:—"In regard to National Prohibition, I wish to state that I favor it, without any ands, ifs or buts, and shall take no backward steps on this proposition." No other candidate for the U. S. Senate mentions this important subject in his platform. Why?)

He says:—"I am an earnest believer in the wisdom and necessity of Protection for the welfare—industrial, agricultural and general—of our people." * * * "I am a Protectionist and believe the Nation will need the policies of the Republican party enacted into law, promptly, and that the readjustment bound to follow the close of the war should be made by the Republican party along the lines of proven and demonstrated political and economic wisdom."

He says:—"Labor has, and can have, no truer, better or fairer friend than I have been and wish to continue to be." * * * "In the administration of great business and development interests in West Virginia, I leave to intelligent and fair-minded men the appraisal of my record wherever the interests of labor have been concerned."

He says:—"It is not necessary for me to say that I favor party harmony and party success, as I have never been a factionalist, and always, since early manhood, an earnest supporter of my party's cause."

He says:—"We all should, and probably do, favor good, permanent roads and highways, with governmental aid to the fullest extent possible." * * * "We, as Republicans, are irrevocably committed to the building up of a merchant marine second to none in the world." * * * "Our people believe in the conservation and preservation, with rational use for the benefit of the people of our natural resources—water-power, mineral and timber wealth, and the development and use of our great waterways."

He says:—"In governmental affairs I shall favor intelligent and proper economy and the efficiency of administration which should characterize capable and patriotic services by all on the government payroll."

What More Could You Ask, Republicans, In a Candidate For the U. S. Senate? Does This Platform Appeal To You? If So, Nominate Major Davis Elkins on August 6.

Ladies Ask your Druggists for
Chichester's Pills in Red and Gold wrapper.
They are made with Blue Ribbon
Cocoa and are the only
Pills that are truly
SOLD BY DRUGGISTS EVERYWHERE

There is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it a constitutional disease. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally and goes from the blood to the mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio.
Sold by Druggists, etc.
